

Principality of Sealand

Government Commission VRILIA

VRIL

Greetings at the Turn of the Years 2015-2016

Our efforts announced in the last Greetings 2014-2015 have among other things brought the following results:

We had informed the Federal Chancellor Dr Merkel, the Prime Minister of Brandenburg, Dr Woidke, the Governing Mayor of Berlin Michael Müller, the Interior Minister De Maizière, the station rbb that we offer the asylum seekers practical access to the Vril technology through free testing. Not a single one of the persons thus contacted has availed themselves of the testing option offered at no cost, nor did anyone accept the invitation to a personal discussion. Vril energy can neither be destroyed nor hindered.

The complete documentation is to be found as PDF on our website www.principality-of-sealand.eu/neu_d.html.

The recent occurrences of civil unrest in Germany confirm our realisation that only the partial release of the Vril technology will offer a solution. As we had stated repeatedly only the unconditional capitulation of the USA and the community of faith ruling them may open the path to peace in the world. The lead management for these measures has been taken up by the Government Commission VRILIA, this can be checked and without alternative.

The increasing understanding by the world populace will further encourage us to follow our goals. This was confirmed by the decisions reached recently at the climate conference in Paris by most states of the world.

Please read these two documentations:

The corresponding PDFs are [here](#) and [here](#).

We wish all co-thinkers and combatants a healthy and successful New Year in the hope that it will also foster a change in the world's politics.

Johannes W. F. Seiger
Member of the Government Commission VRILIA

Urs Thoenen
Minister for Cultural Affairs
and Information of the
Principality of Sealand
